

Welcome to the Rich Dad family and congratulations again on this very major step you have taken in your life! This will be a tremendously life changing opportunity if you are steadfast and diligent in learning the trading strategies you've enrolled in. I'm extremely excited for you as you take this new step towards learning how to trade the markets. The sky is the limit as they say!

I want to do two things in this communication between you and I. First of all I promised you some books, software, spreadsheets, PDF files, free magazine subscriptions and tools that will help you going forward and the links to all of those "freebies" are located for immediate download for you at www.FreeTradingDownloads.com . Some of the files are quite large so I would recommend you build one new file folder on your computer to hold them all in and download them all one by one.

Second, and much more important, I want to make sure that you have the best success you can have with your training. It is absolutely critical that we maintain an open and honest two way communication. It's important to understand as I mentioned to you in our last bonus class session together that I work under the premise that if a day or week goes by and I don't hear from you I simply assume it's because your making so much money trading that you only have time to count your new found wealth and can't take a break to email me! Please, let's make sure and stay in touch and never let yourself get frustrated or off track in your learning and progress. Don't hesitate to email me in the future at anytime if you have questions, concerns or comments. Daily contact is O.K. if you have questions. Remember, I'm here for you! I want to be your "back stop to success" in this process.

Thirdly, I want to make sure you are trying to adhere to the 5 week action plan that I had you download in class on day two. If

you feel yourself getting off-track please let me know and I can help you get back to where you need to be.

As I have said so many times, your education should be an investment, not an expense. Investments pay themselves back and put money in our pocket, not take it out so let's keep focused on doing the two hundred practice trades and get to the point that you feel comfortable by the end of 5 weeks doing your first "real" trades. I want to see you generating cash flow in week 6 and thereafter! Please email me before you make your first trade so I can help you analyze it. As I've mentioned in class, I am not your financial advisor and can't give you investment advice but I do want to play "Devil's Advocate" and see if I can help you find some weak links in your first real trades and maybe be an objective third party sounding board for you. Also every time you have achieved some success with your trading in the future please take a moment and shoot me off an email. It is your success' that drives me to keep doing these classes.

One last truly key component to getting you set up is downloading the trading journal so we can track all your trades, opening your binary trading account and your brokerage trading account. If you did not get that done as part of your action assignments in our class together go to these links now and get it done!

I want to hear back from you as you progress on how you are doing so please stay in touch.

To your greatest success,
Scott Stewart
